

Intelligent Document Automation

Engineered for faster intake. Built for better care.

When referral faxes come in, processing them manually can slow down your intake process. That's where Intelligent Document Automation comes in. Our solution works within your existing workflow, reading, classifying, and extracting data from referral faxes. It automatically creates patient records and sales orders within Brightree, helping you move patients forward in care faster.

How Intelligent Document Automation can support your team

Accelerate intake time

Automate patient and order creation for faster onboarding

Reduce denials

Fewer manual errors mean more accurate claims

Maximize efficiency

Boost time and cost savings to focus on delivering exceptional care

Scale with confidence

Compatible with all product and payors

The results speak for themselves...

98%

document classification accuracy

95%+

data extraction accuracy

50%+

time savings in patient and order creation

Based on average time saving and accuracy results for beta customers. Results may vary.

What makes Brightree different

- Creates new patient and doctor records automatically
- Provides patient matching and auto-eligibility checks
- Categorizes and files documents
- Generates sales orders automatically

Fresh. Modern. *Built for you.*

Because when your tools work smarter, your team does too. With Intelligent Document Automation, a faster intake process is right around the corner.
